Fuel filtration and Priming System
Increase Uptime and reduce call out costs.

Fuel Filtration and Priming System

Contaminated fuel is one of the leading causes of system shutdown. This can lead to delivery delays and unforeseen costs. A second cause for engine shutdown is running out of fuel. These problems can be avoided by installing the Thermo King Fuel Filtration and Priming system. The Thermo King Fuel Filtration and Priming system minimises the risk of unit shutdown, increases uptime and reduces service call outs.

Service Part Number # 100415

The 3-in-1 fuel filtration and priming system comprises:

- Fuel filter - water separator - priming pump
- Rugged priming pump for on the spot fast system priming
- Replacement filters available
- Easy to retrofit for all truck and trailer applications

In addition the system can be easily primed by the driver when the unit has run out of fuel.

Keeping you on the move, **fitted price £130 (+ VAT)**, with the average breakdown costs this represents a huge potential saving!!!
